## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 9, 11 and 12 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ichino (4.823,612).

Ichino teaches an ultrasonic flowmeter comprising a pipe segment (10) connected to a first pipe and a second pipe, a first and second standard connection located at the first and second end of the pipe segment in form of standard flanges, a primary flow sensor comprising at least one ultrasonic transducer for transmission and/or reception of ultrasonic signals and a sensor electronic for providing measurement signals representing the fluid flow. The transducers are inserted in opposite bores in the pipe segment on the outside walls.

# Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - '(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 10 and 13-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ichino in view of Feller (6,508,134).

Ichino shows all the features of the instant invention except the pipe section being welded to the pipe segment. It would be within the scope of a skilled individual to use any know technique

Application/Control Number: 10/809,708

Art Unit: 2855

such as welding or bolting the pipe sections to the pipe connectors in order to form a leak-proof connection between the two elements. As to the housing for electronics mounted on the pipe segment, Feller teaches a housing mounted on the pipe segment. It would be obvious to a person having ordinary skill in the art to provide a housing of Feller for housing the electronics of Ichino since such and arrangement would provide easy access of the electronic when needed. As to the cable connector, it would be a required element for connecting the transducers to the electronics within the housing.

### Response to Arguments

5. Applicant's arguments filed 5/16/05 have been fully considered but they are not persuasive. The arguments that the present invention relates to a sonic- or ultrasonic flowmeter which is suited for replacing a differential pressure flowmeter is acknowledged. However, replacing one known device with another known device would not have been an inventive step. While the technology changes individuals replace one existing old device with a new reliable and advanced device. Sometimes we need to modify the structure to accommodate the new device sometimes we may need to make a device that may fit an existing space. Utility companies replace old meters with new and advanced technology meters without doing any modifications to the existing pipes coming out from the ground and the ones entering the building. Thus replacing one known unit with a different type of a known new unit does not make it patentably distinct. Individuals change one brand of device with a different brand within the same location and thus replacing a known sonic meter with a known differential meter is not patentably distinct.

#### Conclusion

6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Harshad Patel whose telephone number is (571) 272-2187. The examiner can normally be reached on Monday-Thursday (7:00 AM-5:30 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Lefkowitz can be reached on (571) 272-2180. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
